# This bottle is about to start a smart revolution

For foodservice, it makes sense to purchase prepared and specialty sauces in 4 litre containers. But up until now, it's been almost impossible to decant sauce from a large container into condiment bottles without spills, waste or mess. That's why the design of Fountain's new smartPOUR™ 4 litre bottle is so revolutionary.

- The new smartPOUR™ bottle features a vented tube that allows air into the bottle while decanting, greatly reducing the glogging and sudden sauce surges that lead to spills and mess.
- Its offset neck minimises sauce after-drip.
- The ergonomically designed centre-grip handle makes it easier to hold and reduces wrist strain.
- A second handle designed specifically for carrying.
- The scalloped base can reduce residual sauce wastage by up to 25% saving you valuable dollars.
- It's also smart enough to fit inside the fridge door for storage after use.

## Gluten Free

Fountain's innovation hasn't stopped with the smartPOUR™ bottle. 12 of the 13 sauces in the range are gluten free, packed with all the flavour you've come to expect from Fountain®, making it easier to meet your customers' dietary requirements.

So now you can quickly and easily share your favourite sauces with your customers without spills, waste or mess. And that's got to be good for business.
